

ALL THE MOVIES, ALL THE STARS, NOW INSIDE ROCKET!

ROCKET's movie database interface allows you to access the VideoSource Select movie information directly from inside ROCKET. Have all the movie details inside your Product file - for rental and retail products - linked to titles already in your store or upcoming new releases. And keep it all up to date with the twice-monthly VSS subscription service provided by Trade Service of Australia. (Initial database load may also need to be purchased)

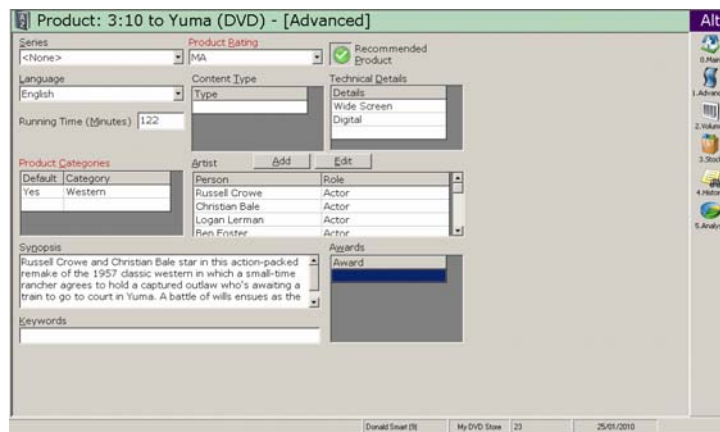

CHECK THESE FEATURES!

- ▶ Enquire on forthcoming new releases before you receive the stock
- ▶ Enquire by actor or director for any format
- ▶ Assist customers by seeing the synopsis, technical details, etc - all filled in from the VSS database
- ▶ Updates existing entries when prices or suppliers change

Data imported includes:

- UPC & title name by format
- Catalogue number
- RRP, if available for sale
- "Hire from" date
- Series
- Original language
- Rating
- Running time
- Technical details
- Category
- Artists & director
- Awards
- Synopsis
- Keywords
- If available from supplier

TOP: Using ROCKET's advanced search feature you can search your store database for movies for hire or sale by artists, series, etc.

LEFT: Movie information is updated automatically from the VSS movie database.
